

ARPA Update

ARPA Credits Members an Electric Cost Adjustment

ARPA recently credited its member municipalities approximately \$190,000 after discovering a billing error from its supplemental power provider that resulted in an overcharge for electricity for the months of May and June 2011. This credit will effectively reduce member electric rates by more than a ½ cent per kilowatt hour for the month of September.

Lamar Repowering Project

The Lamar Repowering Project is operating in test mode and the modifications made to the facility are being evaluated. The plant is employing approximately 45 people.
